

**COLUMBUS
STAINLESS**

[Pty] Ltd

A Subsidiary of ACERINOX, S.A.

Title:

PRODUCT CATALOGUE

Document No: **TCS-EDP-001**

Implementation Date: 30 July 2026

Revision: 19

I. SCOPE

This publication covers the production range of hot rolled plate and coil, cold rolled sheet and coil and continuously cast slabs. Inclusion of any item in this document is not prejudicial to price lists, selling prices or delivery lead time which should be confirmed prior to order placement, nor does such inclusion guarantee acceptance of an order. Minimum and/or multiple quantities may be required for certain combinations. Product items not included in this document may also be considered, subject to enquiry.

II. VALIDITY

This document may be changed without prior notification. Please ensure that you have the most recent document by checking with the Technical Customer Services Department.

III. ENQUIRIES

For further information, please contact:

Department: Technical Customer Services OR Commercial

Tel: +27 (13) 247 3343

+27 (13) 247 2020

E-mail: technical-help@columbus.co.za

IV. DISCLAIMER

The data, results, content and information contained in this document have been produced in good faith by Columbus Stainless (Pty) LTD, based on its up-to-date technical expertise, tools and knowledge, and regarding the data, samples and/or requests which were delivered.

The information, analysis, data and results which may arise or to be derived from this document are not intended to replace procedures, studies, testing and/or analyses carried out by experts and should not be used nor taken into account for any application and/or utilization of it, either specific or generic in nature, without previously receiving specific professional advisement regarding what metallurgical, physical, chemical properties, or any other specific area, may apply.

Furthermore, neither do the information, analysis, data and results contained in this document intent to constitute an exhaustive or complete report regarding any of the characteristics, results and data that is applicable or relative to the products or materials it contains, especially given the countless number of purposes and destinations of the products and materials hereby described, and the variables and the circumstances which may affect them.

This document is property of Columbus Stainless (Pty) LTD, and may not be utilized for purposes other than those which it has been intended. The total or partial reproduction, either direct or indirect, of its content, as well as its distribution, translation, remission, transformation or utilisation by any means, system or procedure remains strictly prohibited without the prior written consent of Columbus Stainless (Pty) LTD.

Columbus Stainless (Pty) LTD, its agents and consultants are exempt from any responsibility regarding the information, data, results and contents of this document, and therefore bear no responsibility regarding for any direct or indirect damage, loss or harm cause to any person or organisation, no matter its cause, which may be derived or related to the content of this document or the omission from it. In particular, Columbus Stainless (Pty) LTD, bears no responsibility for the extrapolation or generalization of this content, results, information or data.

The use of this information contained in this document is considered to represent the expressed acceptance of this clause or legal disclaimer.

4.13	Pack Masses	24
4.13.1	Coil Mass.....	24
4.13.2	Plate and Sheet Pack Mass	25
4.14	Packing.....	26
4.14.1	Coils	26
4.14.2	Plate and Sheet	27
5	Slab Supplied for Rolling or Forging.....	28
6	Summary of Changes	29
7	Document approval	31

1 TYPES AVAILABLE

Below are the types available with general chemistry limits based on the tightest limits for the most common certifications, typically ASTM, EN and Columbus Stainless mill specification. For actual limits consult the applicable specification.

1.1 Chemistry

1.1.1 Ferritics

Classification	Type		Compositions ¹										
	General	ACX	C	Si	Mn	P	S	N	Cr	Ni	Ti	Nb	Other
Utility Ferritic	3CR12	C211	0.030	1.00	1.50	0.040	0.015	0.030	10.5-12.5	0.30-1.50	4x(C+N) to 0.6	-	-
	3CR12L	C220								0.30-1.00	-		
	410S	C420								0.60	-		
Standard Ferritic	40910	C800	0.030	1.00	1.00	0.040	0.015	0.030	10.5-11.7	0.50	6x(C+N) to 0.5	0.17	-
	40920	C808									8x(C+N) & 0.15 to 0.5	0.1	
	40975	C700								0.50-1.00	6x(C+N) to 0.75	-	-
	430	C500	0.08	1.00	1.00	0.040	0.015	-	16.0-18.0	0.75	-	-	-
	430DDQ	C530									-	-	-
	439Nb	C515									Ti+Nb: 4x(C+N)+0.20 to 0.75 ²	Al: 0.15 max	
	43920	C590	0.025	0.50	0.50	0.040	0.015	0.030	17.0-18.0	-	Ti+Nb: 4x(C+N)+0.20 to 0.80 ²		
	441	C845	0.030	1.00	1.00	0.040	0.015	-	17.5-18.5	-	0.1-0.6	3xC+0.3 to 1.00	-
		C843									0.15-0.6		
		C841									0.1-0.6		
		C840									0.1-0.6		
Moly Ferritic	436	C550	0.08	1.00	1.00	0.040	0.015	0.040	16.0-18.0	-	-	5xC & 7x(C+N)+0.1 to 0.8	Mo: 0.80-1.25
	436M/T	C553											Mo: 1.20-1.25
	444	C555	0.025	1.00	1.00	0.040	0.015	0.030	17.5-19.5	0.40	Ti+Nb: 4x(C+N)+0.20 to 0.8 ²		Mo: 1.80-2.50
	444T	C982											Mo: 2.00-2.50

Notes

1. Compositions are maximum values, unless otherwise stated. Balance is iron
2. For EN 10088-2 $Ti+4/7Nb > 4(C+N)+0.15$, according to the atomic mass of these elements: Nb (% by mass) $\equiv 7/4$ Ti (% by mass).

1.1.2 Duplexes

Classification	Type		Compositions ¹										
	General	ACX	C	Si	Mn	P	S	N	Cr	Ni	Mo	Cu	PRE ²
Lean Duplexes	2001	C920	0.030	1.00	4.0-6.0	0.035	0.030	0.05-0.17	19.5-21.5	1.50-3.00	0.10-0.60	1.00	22.0
	2304	C940	0.030	1.00	2.00	0.030	0.015	0.05-0.20	22.0-24.0	3.5-5.5	0.10-0.60	0.10-0.60	25.0
Standard Duplex	2205	C900	0.030	1.00	2.00	0.030	0.015	0.14-0.20	22.0-23.0	4.5-6.5	3.0-3.5	-	35.0

Notes

1. Compositions are maximum values, unless otherwise stated. Balance is iron
2. PRE is Pitting Resistance Equivalent = $Cr + 3.3Mo + 16N$

1.1.3 Austenitics

Classification	Type		Compositions ¹									
	General	ACX	C	Si	Mn	P	S	N	Cr	Mo	Ni	Others
Cr-Ni Austenitic	304	C120	0.07	0.75	2.00	0.045	0.015	0.10	18.0-19.5	-	8.0-10.5	-

2 FINISHES AVAILABLE

Columbus	Acerinox	ASTM/ ASME	EN	BIS	JIS	Description
Unground	595	-	-	-	-	Slabs with no grinding.
Ground	596	-	-	-	-	Slabs with grinding.
HR	599	-	1U	No. 0	-	Hot rolled (not heat treated, not descaled). Suitable for products which are to be further worked (e.g. re-rolling).
HRA	504	-	1C	No. 0	-	Hot rolled and heat treated (not descaled). Suitable for industrial heat resisting and materials handling applications.
No. 1	501	No. 1	1D	No. 1	No. 1	Hot rolled, heat treated and descaled. Suitable when smoothness and uniformity of finish are not important.
2D	512	No. 2D	2D	No. 2D	No. 2D	Cold rolled, heat treated and pickled. Dull, smooth finish. Suitable for forming applications.
2B	522	No. 2B	2B	No. 2B	No. 2B	Cold rolled, heat treated and pickled. Bright and smoother finish than 2D (obtained by skin passing or tension levelling).
2E	524	No. 2B	2E	No. 2B	-	Cold rolled, heat treated and mechanically descaled, may be followed by pickling. Rough and dull finish.
No. 3 ²	531	No. 3	2G	No. 3	HL No. 3	A linearly textured polished finish, one or both sides, typically using 120 grit polishing belts, with a transverse Ra <1.5 µm.
No. 4 ²	543 523	No. 4	2G	No. 4	HL No. 4	A linearly textured polished finish, one or both sides, typically using 180 to 240 grit polishing belts, with a transverse Ra <1 µm.
SB ²	551	No. 6	2J	No. 6	-	ScotchBrite finish, one or both sides, with a transverse Ra <0.5 µm.
SSB ²	553	-	-	-	-	Superior ScotchBrite finish, one or both sides, with a transverse Ra <0.25 µm.
BA	571	Bright Annealed Finish	2R	BA	BA	Cold rolled, bright annealed finish, retained by final annealing in a controlled atmosphere furnace and skin passed. Smooth, bright, reflective finish.
BE	510	-	-	BA	BA	Columbus 2B cold rolled, but final anneal in a controlled atmosphere furnace.
TR	572 / 573	TR	2H	-	-	Finish obtained by Cold Rolled, annealed pickled and Temper Rolled.

Notes

- Each type is available in one or more, but not necessarily all of the finishes listed above.
- Material is polished on one or both sides at mill's option. When polished on both sides, the superior finish will be on top. Where polyethylene (PE) coating is specified, this will only be applied to the superior surface. If the bottom requires a specific finish it should be specified with order placement.

Notes:

1. Minimum and maximum gauges might be restricted by specifications
2. Maximum gauge for trimmed coil is 8 mm
3. Negative tolerances are not available on minimum gauges
4. Positive tolerances are not available on maximum gauges
5. If actual gauge is above maximum the material may be processed as plate
6. 441 only certifiable to ASTM A240
7. H-grade equivalents are only available if grain size requirement is waived
8. HR material above maximum up to 12 mm is available in coil form with certification to Chemistry only due to sampling constraints

3.1.3 Hot Rolled Gauge Ranges for Plate

	1.4841 (310Si)	8 - 50.8	8 - 50	8 - 50.8	8 - 50

Notes:

1. Minimum and maximum gauges might be restricted by specifications
2. Negative tolerances are not available on minimum gauges
3. Positive tolerances are not available on maximum gauges
4. 409 and 441 only certifiable to ASTM A240

3.1.4 Standard Cold Rolled Gauges

Metric Gauges		Imperial Gauges	
(mm)	Equivalent (in.)	Equivalent (in.)	Equivalent (mm)
0.4	0.0157	-	-
0.5	0.0197	0.018	0.452
0.6	0.0236	0.024	0.597
0.7	0.0276	0.029	0.739
0.8	0.0315	0.032	0.818
0.9	0.0354	0.036	0.902
1.0	0.0394	0.040	1.028
1.2	0.0472	0.048	1.219
1.5	0.0591	0.060	1.511
1.6	0.0630	0.067	1.702
1.8	0.0709	0.075	1.905
2.0	0.0787	0.090	2.286
2.5	0.0984	0.105	2.667
3.0	0.1181	0.120	3.048
3.5	0.1378	0.135	3.429
4.0	0.1575	0.150	3.813
4.5	0.1772	0.165	4.191
5.0	0.1969	0.187	4.760
5.5	0.2165	0.219	5.556
6.0	0.2362	0.25	6.35

Notes:

1. Only Metric Gauges are standard.
2. Decimal thickness, and not gauge number, should be specified when ordering as recommended in ASTM A480, to prevent any confusion with the various gauge number scales in use.

3.1.5 Cold Rolled Gauge Ranges for Coil and Sheet

General Type		Width < 1 300 mm				Width ≥ 1 300 mm	
		2D/2B/2E ⁶	BA	BE	Polished	2D/2B/2E ⁶	Polished

	316L-1.4404	0.4 - 6.35	0.4 - 1.6	0.4 - 1.6	0.4 - 3	0.7 - 6.35	0.7 - 3
	316L-1.4435	0.4 - 6.35	-	0.4 - 1.6	0.4 - 3	0.7 - 6.35	-
	316LN	1 - 6.35	-	-	-	1.5 - 6.35	-
	316Ti	0.4 - 6.35	-	0.4 - 1.6	-	0.7 - 6.35	-
	309S-1.4833 ^{8,9}	0.4 - 6.35	-	0.4 - 2.0	-	0.7 - 6.35	-
	1.4828(309Si) ⁹	0.4 - 6.35	-	0.4 - 2.0	-	0.7 - 6.35	-
	310S-1.4845 ^{8,9}	0.4 - 6.35	-	0.4 - 1.6	-	0.7 - 6.35	-
	1.4841 (310Si) ⁹	0.4 - 6.35	-	0.4 - 1.6	-	0.7 - 6.35	-

Notes:

1. Minimum and maximum gauges might be restricted by specifications
2. Gauges other than the ones quoted may be available on enquiry and may be subject to minimum order quantities.
3. Gauges less than 0.4 mm are only available in the local market.
4. Negative tolerances are not available on minimum gauges
5. Positive tolerances are not available on maximum gauges
6. Minimum gauge on 2E finish is 0.8 mm.
7. Roofing quality 3CR12 is available in 0.6 mm and 925 mm wide, suitable for roofing, cladding, etc.
8. H-grade equivalents are only available if grain size requirement is waived
9. Heat resisting grades are only available as BE or 2E. 2B and 2D are only available with the understanding that the surface will be lightly shot blasted.

3.2 Coil Dimensions

3.2.1 Standard Widths

Trimmed Width
1 000
1 219.2
1 250
1 500
1 524

3.2.2 Maximum width

The maximum trimmed or good width is 1524 mm, except for 409 cold rolled and 439Nb cold rolled and hot rolled coil and sheet with a maximum of 1520 mm.

3.2.3 Slit Widths

Gauge Range (mm)	Minimum Slit Width (mm)
≤0.7	10
>0.7 to 3.0	25
>3.0 to 5.0	35
>5.0 to 6.35	45

3.3 Plate/Sheet/Blank Dimensions

3.3.1 Standard Dimensions

Below are the standard sheet and plate dimensions and should be considered along with the possible thicknesses for the particular type.

Width		Length		Length		Length		Length		Length	
(mm)	(in.)	(mm)	(in.)	(mm)	(in.)	(mm)	(in.)	(mm)	(in.)	(mm)	(in.)
1 000		2 000				3 000		6 000		8 000	
1 219.2	48			2 438.4	96	3 048	120	6 096	240	7 315.2	288
1 250				2 500		3 000		6 000		8 000	
1 500						3 000		6 000		8 000	
1 524	60					3 048	120	6 096	240	7 315.2	288

Notes:

1. Other widths and length may be available on request and may be subject to minimum order quantities.
2. Plates longer than 6096mm may be plasma cut at mill's option.

3.3.2 Sheet and Plate Lengths

Gauge (mm)		Length (mm) ¹		
min	max	Minimum	Maximum	Exceptions
0.4	2	600	7 000	
>2	2.5	1 250	5 500	
>2.5	6.35	1 100	6 700	
>6.35	<8	1 100	6 700	1 560-6 100 mm for duplexes
				1 560-8 000 mm for ferritics (excluding 3CR12)
8	10	1 560	8 000 ²	Duplexes: maximum length is 6 100 mm
>10	16	1 560	8 000 ²	Duplexes & ferritics (excluding 3CR12): maximum length is 6 100mm
>16	63	1 560	8 000	Length is limited by a maximum allowable piece mass of 5 000 kg

Notes:

1. Plates lengths greater than the above may be available on enquiry.
2. Maximum length is 6100 mm for shear cut edges

3.3.3 Blank dimensions

Attribute	Min	Max
Gauge	0.40	2.50
Width	65	750
Length	75	1000

4 **DELIVERY CONDITIONS**

4.1 **Ordering Information**

In order to ensure accurate product definition and manufacturing the minimum requirements specified by the various standards should be supplied. Any additional requirements should also be given to ensure the accuracy of the final product. The information can be supplied via a customer's technical product/delivery specification, on the purchase order or using the Product Specification Sheet in [Annexure A](#).

Minimum information required:

- Steel/Alloy type,
- Specification and grade, including multiple and dual certification,
- Product form
- Finish and/or condition
- Edge condition
- Dimensions
- Certification requirements, including the certificate type and any regulatory requirements
- Pack mass limits
- Coating or interleaving, if other than default as defined in paragraph 4.9.

Optional information:

- Dimensional tolerance and delivery condition standard, if not specified by the required standards and any special tolerances in the standard
- Packing and delivery requirements
- Special marking requirements
- Chemical exceptions
- Mechanical exceptions
- Any other special requirements not covered above

4.2 **Certification**

Hot and Cold rolled products can be certified to the most recent, active revision of the following specifications:

ASTM	ASTM A240/A240M
ASME	ASME BPVC IIA SA240 / SA240M
EN	EN 10088-1
	EN 10088-4
	EN 10088-2
	EN 10028-7
	EN 10095
SANS	SANS 50028-7
IS	IS 6911
JIS	JIS G 4304
	JIS G 4305
	JIS G 4312

Other specifications can be supplied based upon agreement between the customer and Columbus.

Regardless of the specification and tolerances required by the customer, all certificates are issued in terms of EN 10204. The following certificates are available:

EN 10204	Description	Conditions of Issue
3.1	Internal Independent Inspection	Issued unless otherwise specified
3.2	External Independent Inspection	Inspected and certified by TÜV Rheinland, when requested

For detail of approved certifications consult the Quality Product Certifications page at www.columbus.co.za. Approved product certifications are given below.

4.2.1 Certification to AD Merkblatt

Certain approved steel types manufactured to EN 10028-7 are available for certification to AD 2000 W2 and AD 2000 W10 (TÜV certification), with the approval as below.

4.2.1.1 Certification to Pressure Equipment Directive (PED 2014/68/EU)

Certification to PED 2014/68/EU is available on Columbus material produced to EN 10028-7, ASME SA240 and ASTM A240 to accredited dimensions, with the approval of TÜV Rheinland Polska. For the details of approved grades and thicknesses consult the [certificate](#) and [annexure](#).

4.2.1.2 Certification to Pressure Equipment Safety Regulations 2016 (SI 2016 No.: 1105 as amended)

Certification to Pressure Equipment Safety Regulations 2016. SI 2016 No.: 1105 as amended is available on accredited grades and thicknesses according to the scope of certification, with the approval of TÜV Rheinland UK. For the details of approved grades and thicknesses consult the [certificate](#) and [annexure](#).

4.2.2 Certification to Construction Product Regulation/CE Mark (CPR 305/2011/EU and EN 10088-4)

CE mark certification to EN 10088-4 and CPR 305/2011/EU is available on material up to the maximum gauges specified in the scope of certification, as approved by TÜV Rheinland Polska. For the details of approved grades and thicknesses consult the [certificate](#) and [annexure](#).

4.2.3 Certification to Construction Product Regulation 2011 (retained EU law 305/2011/EU) as amended - UKCA mark (EN 10088-4)

UKCA mark certification to EN 10088-4 is available on material up to the maximum gauges specified in the scope of certification, as approved by TÜV Rheinland UK. For the details of approved grades and thicknesses consult the [certificate](#) and [annexure](#).

4.2.4 IS 6911 Certification

Certification to IS 6911:2017 is available according to the scope of certification as defined in the [licence](#) for the period defined in the [renewal](#).

4.2.5 JIS Certification

JIS certification is available on material up to the maximum gauges specified in the scope of certification, as approved by JQA. For the details of approved grades and thicknesses consult the certificates for [Stainless Steel](#) and [Heat-resisting Steel](#).

4.3 Tolerances

Material can be ordered to the tolerances listed below:

Product Group	Specification
All	ASTM A480/ASTM A480M
	ASME SA480/ASME SA480M
	IS 6911
	JIS G 4312
Plate	ISO 18286
	EN 10051
	JIS G 4304
Hot rolled coil and sheet	ISO 9444-2
	EN 10029
	JIS G 4304
Cold rolled coil and sheet	ISO 9445-2
	JIS G 4305

Material tolerances are only guaranteed to the ASTM, ASME, EN, ISO, IS and JIS tolerances listed above. Any special customer requirements should be agreed upon order placement.

All gauge measurements are taken 25 mm from the edge on trimmed material. On mill edge material, the measurement is taken at least 25 mm from the edge, depending on the tolerance specification requirement.

4.3.1 Hot Rolled Gauge Tolerances

Material will be rolled to either of the mill's best aim tolerances listed below, although tolerances are only guaranteed to the tolerance standards listed in 4.3 above. If special limits, as defined in the standard, are required it should be specified with order placement. Tolerance outside these standards and the limits below may be available on request.

Nominal Gauge (mm)	Mill's Best Range (mm)	Normal (mm)		Positive (mm)	
		-	+	-	+
3.0	0.29	0.25	0.04	-	-
>3.0 to 3.5	0.31	0.25	0.06	-	-
>3.5 to 4.0	0.33	0.25	0.08	0.00	0.33
>4.0 to 4.5	0.35	0.25	0.10	0.00	0.35
>4.5 to 5.0	0.36	0.25	0.11	0.00	0.36
>5.0 to 6.0	0.40	0.25	0.15	0.00	0.40
>6.0 to 8.0	0.48	0.25	0.23	0.00	0.48
>8.0 to 10	0.55	0.30	0.25	0.00	0.55
>10 to 12	0.63	0.30	0.33	0.00	0.63
>12 to 14	0.70	0.30	0.40	0.00	0.70
>14 to 15	0.74	0.30	0.44	0.00	0.74
>15 to 16	0.78	0.30	0.48	0.00	0.78
>16 to 18	0.85	0.30	0.55	0.00	0.85
>18 to 20	0.93	0.30	0.63	0.00	0.93
>20 to 22	1.00	0.30	0.70	0.00	1.00
>22 to 25	1.11	0.30	0.81	0.00	1.11
>25 to 28	1.23	0.30	0.93	0.00	1.23
>28 to 30	1.30	0.30	1.00	0.00	1.30
>30 to 32	1.38	0.30	1.08	0.00	1.38
>32 to 35	1.49	0.30	1.19	0.00	1.49
>35 to 40	1.68	0.30	1.38	0.00	1.68
>40 to 50	2.05	0.30	1.75	0.00	2.05
> 50 to 60	2.43	0.30	2.13	0.00	2.43

4.3.2 Cold Rolled Gauge Tolerances

Material will be rolled to either of the mill's best aim tolerances listed below, although tolerances are only guaranteed to the tolerance standards listed in 4.3 above, unless otherwise agreed at order placement. If special limits, as defined in the standard, are required it should be specified with order placement. Tolerance outside these standards and the limits below may be available on request. Normal tolerance will be rolled to either the Split or Negative tolerances at mill's option.

Nominal Gauge (mm)	Mill's Best Range (mm)	Split (mm)		Negative (mm)		Positive (mm)	
		-	+	-	+	-	+
≤0.25	0.026	0.013	0.013	-	-	-	-
>0.25 to 0.3	0.026	0.013	0.013	0.026	0.000	0.000	0.026
>0.3 to 0.4	0.030	0.015	0.015	0.030	0.000	0.000	0.030
>0.4 to 0.45	0.038	0.019	0.019	0.038	0.000	0.000	0.038
>0.45 to 0.5	0.042	0.021	0.021	0.042	0.000	0.000	0.042

>5.5 to 6.35	0.164	0.082	0.082	0.164	0.000	0.000	0.164

Notes:

1. Slits for gauge > 6 mm is rolled to the min of the specification and mill's best for the max.

4.3.3 Plate Trimmed Width Tolerance

Plate material is produced to the aim width tolerances below. For certain standards there are too many ranges to summarise. The standard should be consulted for the correct limits. If special limits, as defined in the standard, are required it should be specified with order placement. Tighter tolerances should be negotiated with order placement.

Specification	Gge Min	Gge Max	Width Min	Width Max	-	+
ASTM A480	-	-	1 000	1 524	0	15
ISO 18286	-	-	600	1 524	0	15
EN 10029	6	40	-	-	0	20
	40.01	75	-	-	0	25
IS 6911	6	<10	-	-	0	5

JIS G 4312							

4.3.6 Untrimmed Width Tolerance

Below are the aim width tolerances. Tighter tolerance should be negotiated with order placement. Orders may be rejected if the standard requires a tighter tolerance which cannot be achieved.

Final good width	1 000	1 200	1 220	1 250	1 500	1 524
Untrimmed width	1 045	1 245	1 265	1295	1545	1 569
Min width ¹	1 030	1 230	1 250	1 280	1 530	1 554
Max width ²	1 060	1 260	1 280	1 310	1 560	1 584

Notes:

1. Minimum is wider than nominal due to mill edge defects
2. Due to flare the first and last 2.5% may exceed these values

4.3.7 Slit Coils Width Tolerance

Slit material is produced to the aim width tolerances listed below although tolerances are only guaranteed to the tolerance standards listed in 4.3 above.

Gauge Range (mm)	Slit Width (mm)	Tolerance (mm)
≤1.0	≤300	±0.15
	>300 to 600	±0.25
	>600 to 990	±0.50
>1.0 to 1.75	≤200	±0.15
	>200 to 300	±0.20
	>300 to 600	±0.30
	>600 to 990	±0.50
>1.75 to 3.0	≤100	±0.20
	>100 to 200	±0.25
	>200 to 300	±0.30
	>300 to 600	±0.35
	>600 to 990	±0.50
>3.0 to 6.35	≤200	±0.25
	>200 to 300	±0.35
	>300 to 600	±0.35
	>600 to 990	±0.50

4.3.8 Plate Length Tolerance

Plate material is produced to the aim length tolerances below. For certain standards there are too many ranges to summarise. The standard should be consulted for the correct limits. If special limits, as defined in the standard, are required it should be specified with order placement. Tighter tolerances should be negotiated with order placement.

Specification	Length Min	Length Max	-	+
ASTM A480	2 000	3 999.9	0	20
ISO 18286	4 000	5 999.9	0	30
EN 10029	6 000	7 999.9	0	40
	8 000	8 000	0	50
IS 6911	Consult standard			
JIS G 4304				
JIS G 4305				
JIS G 4312				

4.3.9 Hot Rolled Trimmed Sheet Length Tolerance

Hot rolled coil and sheet material are produced to the aim length tolerances below. For certain standards there are too many ranges to summarise. The standard should be consulted for the correct limits. If special limits, as defined in the standard, are required it should be specified with order placement. Tighter tolerances should be negotiated with order placement.

Specification	Length Min	Length Max	-	+
ASTM A480	2 000	6 000	0	0.005 x length
ISO 9444-2 EN 10051	2 000	7 000	0	0.005 x length
IS 6911	Consult standard			
JIS G 4304				
JIS G 4305				
JIS G 4312				

4.3.10 Cold Rolled Trimmed Sheet Length Tolerances

Cold rolled coil and sheet material are produced to the aim length tolerances below. For certain standards there are too many ranges to summarise. The standard should be consulted for the correct limits. If special limits, as defined in the standard, are required it should be specified with order placement. Tighter tolerances should be negotiated with order placement.

Specification	Length Min	Length Max	-	+
ASTM A480	75	2 000	0	5
ISO 9445-2	2 000.1	7 000	0	0.0025 x length
IS 6911	Consult standard			
JIS G 4304				
JIS G 4305				
JIS G 4312				

4.3.11 Blank Tolerance

Width is as per the slit coil width tolerances. Lengths are produced to ± 1.0 mm.

4.3.12 Flatness

Flatness is measured on a flat surface against the applicable standard. Tighter tolerances need to be negotiated with order placement. Flatness on 2D coils cannot be guaranteed.

4.3.13 Camber

Camber can only be measured on sheet and plate. Camber on coil cannot be measured if the concave side is on the opposite side of the inspection point due to safety restrictions in accessing other side of the coil.

4.4 Testing and Releasing

Material will be tested in accordance with the requested certifications. Additional test requirements and exceptions need to be specified and negotiated with order acceptance. Rp1.0 might be reported, even if it is not specified, for information. The intergranular corrosion test ASTM A262 Practise E is routinely done on austenitic material from 0.5 mm upward and might be reported for information.

On 3.1 and 3.2 certificates the tightest limits among the certifications and exception will be printed.

4.5 Material Quality

4.5.1 Surface Condition

Trimmed coil material is guaranteed with at least 97% of surface as prime. Untrimmed coils may be available on enquiry, with 97% of the surface guaranteed as prime after trimming to final width by the customer.

On plate material, surface reclamation is done in accordance with EN10163-2. Note, Columbus do not perform weld repair on plate material.

4.5.2 Seconds Quality

As part of the normal stainless steel production process, there is some inevitable generation of Seconds quality material. Seconds conform to the ASTM or EN requirements for steel type, gauge, width, finish and mechanical properties. In addition, the coil must be capable of further processing by the customer. Typically, this would mean that the steel has surface defects or flatness deviations which can either be polished out or that the defect is relatively isolated and that prime material can be obtained by cutting out the defects. Typical defects that would cause material to be seconds would be skin laminations, stains (or streaks and related defects), scratches, roll marks, indentations, dents, residual scale, etc. Seconds can be untrimmed.

4.5.3 Fourths Quality

Fourths is coil or sheet of Prime or Seconds surface quality. Fourths do not necessarily conform to the ASTM or EN mechanical property requirements. Fourths may include coil ends (which may thus not be properly skin passed or polished). In addition to typical Seconds defects, Fourths can also have edge damage and portions with folds. Coils are supplied with no inner core and thus the inner diameter may be somewhat oval. Fourths can be untrimmed.

4.6 Coil Diameter

4.6.1 Inner Diameter

Mill Edge Black Hot Band

762 mm (30") or 610 mm (24") at Mill's option.

All Other Coils

All coils will have an internal diameter of 610 mm (24"). However, 508 mm (20") coils may be available on enquiry. For material less than 0.7 mm thick and narrower than 600 mm a 406 mm (16") is available on request.

4.6.2 Outer Diameter

Mill Edge Coils

Maximum of 2 100 mm

Trimmed Coils

Maximum of 1 900 mm

4.7 Slit Coils

Slit coils are available up to a maximum gauge of 6 mm. The maximum slit width is 500 mm and can be packed eye to sky, with a maximum pack mass of 5000 kg. Widths above 500 mm will be handled as coil and packed as eye to wall and the coil height will be less than two times the width.

4.8 Coil Supplied for Cutting to Sheet or Slitting

Coil purchased for the purpose of cutting to sheet or slitting is supplied on the understanding that it is the converter's responsibility to ensure that the facilities utilised are capable of producing material that conforms to the specification to which it is processed.

4.9 Paper Interleaving

Hot rolled products are not paper interleaved.

All 2B, 2D, polished and BA finish products will be paper interleaved unless coated or otherwise agreed.

409, 412, 439 and 441 is usually supplied for tube or coil fed press applications and is therefore not paper interleaved unless otherwise agreed.

Slits are usually supplied without paper interleaving, unless otherwise agreed.

4.10 Polyethylene (PE) Coating

PE coating (formerly PVC coating) is not available on coils with a gauge of less than 0.4 mm.

Slit coil products are usually supplied without PE coating, unless otherwise agreed.

The following PE coatings are available and should be specified upon order placement:

Coating	Description	Thickness (µm)
LNC	Novacel Fibre laser Protective Film (Grey)	100
LPF	Polifilm Fibre laser Protective Film (Dark Grey)	100
LAA	Any suitable Fibre Laser Protective Film	100
PVC	PE Black / White Laser Protective Film suitable for CO ₂ Lasers.	70/80
PEB	PE Blue Translucent Protective Film	60
P80	PE Blue Translucent Protective Film for DDQ	80
PLD	Low Density, Low Glue PE Protective Film (Transparent)	50
~	No Coating	-

4.11 Marking

4.11.1 Material Marking

Below is the standard marking that will be applied. Detailed requirements must be noted on order placement.

For continuous line marking the material is marked with the incoming ID. If the outgoing material is split, i.e. smaller coils or different cases for sheets, additional characters will be assigned as identification for traceability and the new ID will be reported on the test certificate and the case label.

HR and HRA Coils

Coils are stencilled on the outer wrap with gauge, type and MPO (coil) number. If required, labels with order information such as customer's name, destination, type, width, gross and net mass, case no., etc. will be placed on each coil.

No. 1 Coil, Sheet and Plate

Coil, sheet and plate material are continuously line marked on the top with MPO (coil) number, type, gauge, dimensions, finish and specification, unless otherwise specified. Detailed requirements must be noted on order placement.

Cold rolled

All cold rolled coils and normal sheet will be continuously line marked on the top surface, unless otherwise specified. For BA, BE and polished material, coil will be marked with a sticker at the beginning and end, while for sheets the top sheet will be marked. Coil and sheet will be marked with MPO (coil) number, type, gauge, dimensions, finish and specification, unless otherwise specified.

4.11.2 Case Marking

Below is an example of a typical case label. The part number will only be displayed if supplied and captured on the Columbus system. If required, additional information can be added as text or in a barcode.

				26-Oct-2021 12:35 Gross: 2476 kg Nett: 2455 kg 8 pcs  COLUMBUS STAINLESS —STEEL— Made in South Africa	4323981X01AC Type: 304L Finish: N01 Coating: N/A Interleaving: None Size: 12.000mm x 1250.00mm x 2500mm	Customer Name Here (Pty) Ltd Customer No: CustomerRef 123456 Order/Item No: LP12345/123 Heat no.: 432398 HS Code: 7219210000 Part no.: Part 123-456 Additional information and special remarks
---	---	---	---	--	--	---

For certified or licenced products the relevant marking and information will be included on the case label.

4.12 End Use

Products are produced to suit customers' end use as far as possible. It is essential therefore when ordering that the end use is stated. Customers are encouraged to consult with Columbus Stainless' Technical Customer Services Department to obtain the material which best suits their purpose. Should no end use be supplied any claims relating to the material will be handled accordingly.

4.13 Pack Masses

4.13.1 Coil Mass

Delivery tolerances are $\pm 10\%$ on order mass.

HR Minimum Coil Mass

The minimum pack mass is 3 500 kg.

Typical Coil Mass

The maximum length of a slab is 11.95 m due to the size of the reheat furnace. Since the thickness of the slab is fixed, the mass of the slab is therefore determined by the width. It is given by the factor of 19.2 kg/mm width (i.e. a 1000 mm wide slab will be 19 200 kg, and 1500 mm slab will be 29 300 kg). The rolled coil yields on average a factor of 17 kg/mm width. Orders for product of a slab as a minimum must consider this. Orders for coils bigger than a single coil must also be optimised to multiples of a single coil.

Number of Full Size Coils for Order

Width	Mass (t)				
	1	2	3	4	5
1000	17.0	34	51	68	85
1219	20.7	41	62	83	104
1250	21.3	43	64	85	106
1500	25.5	51	77	103	128
1524	25.9	52	78	104	130

Ideal Pack Mass

For coil material, pack mass needs to be in subdivisions of a single coil. The table below gives the ideal pack mass ranges for the standard width coils, split into n-parts.

Width	Mass (kg)	1	2	3	4	5
1000	min	14400	7200	4800	3600	2900
	max	19200	12000	8000	6000	4800
1219	min	17600	8800	6200	4700	3700
	max	23400	14600	7800	5900	4700
1250	min	18000	9000	6000	4500	3600
	max	24000	15000	10000	7500	6000
1500	min	21600	10800	7200	5400	4300
	max	28800	18000	12000	9000	7200
1524	min	21900	11000	7300	5500	4400
	max	29300	18300	12200	9100	7300

The minimum mass is calculated as 75% of average coil size or subdivision of it. Maximum mass is capped at the theoretical maximum of an 11.95 m slab; for split coils a 25% head room is added in case where a coil with a defective portion is used and split.

For material thinner or equal to 0.9mm, the risk for collapsing of coils (oval coils) exist. This risk is increased when material is coated with a plastic product (e.g. PVC, LPF, LNC, PEB). For this reason, the maximum pack mass is limited by the height of the coil or slit. Typical values are given below:

Type	Ferritic		Austenitic	
ID	508	610	508	610
Width	Maximum mass for 2H=W			
500	2320	2630	2380	2700
710	5330	5960	5470	6110
914	9880	10920	10130	11200
1000	12000	12000	12000	12000
1219	14600	14600	14600	14600
1250	21690	23650	22250	24250
1500	28800	28800	28800	28800
1524	29300	29300	29300	29300

Notes

1. Only if plastic coated

The formula to calculate the maximum pack mass for another width is given as:

$$MaxPackMass = \pi \cdot density \cdot width^2 (width + 2 \cdot innerdiameter) / 4.$$

Slit Pack Mass

For slits, the same formulas as above can be applied. Due to the infinite number of variations it is not given in this document. Consult with TCS if there is uncertainty. The absolute maximum for slit mass is 5 t, due to lifting and packing equipment constraints (eye to sky). Minimum mass is determined by minimum outer diameter of 950 mm.

Maximum width to pack eye to sky is 499 mm. For packing eye to wall, the constraint is the outer diameter vs width ratio (OD/W) with a maximum of 2, to comply with safety regulations.

4.13.2 Plate and Sheet Pack Mass

Minimum Pack Mass

Material will be supplied with a minimum Pack Mass of:

- Plate $\geq$ 2 000 kg,
- Sheet $\geq$ 1 500kg.

Maximum Pack Mass

The maximum Pack Mass depends on the skid carrying capacity, which is dependent on the gauge and case length. The tables below summarises the limits for plate and sheet:

Gauge (mm)	Plate Skid Length (mm)			
	$\leq 2\ 800$	$> 2\ 800$ to $\leq 4\ 000$	$> 4\ 000$ to $\leq 6\ 200$	$> 6\ 200$
2.5 to 3	4 000kg	3 500kg	3 000kg	-
>3 to 60	4 000kg	4 000kg	3 000kg	5 000kg
>60	5 000kg	5 000kg	5 000kg	5 000kg

Gauge (mm)	Sheet Skid Length (mm)			
	≤ 2 400	>2 400 to ≤2 800	>2 800 to ≤4 000	>4 000 to ≤7 100
0.3 to <1.0	2 500kg	2 000kg	2 000kg	1 000kg
1.0 to <1.5	3 000kg	3 000kg	2 500kg	1 500kg
1.5 to 1.9	3 500kg	3 500kg	3 000kg	2 000kg
>1.9 to 2.0	3 500kg	3 500kg	3 000kg	2 500kg
>2.0 to 3.0	4 000kg	4 000kg	3 500kg	2 500kg
>3.0 to <3.8	4 000kg	4 000kg	4 000kg	2 500kg
3.8 to <4.0	4 000kg	4 000kg	4 000kg	3 000kg
≥4.0	4 000kg	4 000kg	4 000kg	3 300kg

4.14 **Packing**

Full packing details are available on request. However, some generalised packing methods are given below.

4.14.1 **Coils**

No. 1 Coil

Packing is suitable for rail/road/sea transport. Coil axis is horizontal. Coil has no wooden base, unless shipped in containers. The coil is labelled with two bar code labels, one on either side of the coil.

Black Hot Band Coil

Packing is suitable for rail/road/sea transport. Coil axis is horizontal. Coil is without packing material. Strapping is with a suitable steel strapping. The coil is labelled with two bar code labels, one on either side of the coil.

Cold Rolled Coil

Packing is suitable for rail/road/sea transport. Coil may have inner cores in gauges of 0.8 mm and less. Coil axis is horizontal. Coil has no wooden base, unless shipped in containers. The coil is labelled with bar code labels, on either side of the coil.

Fourths Cold Rolled Coil

Coil axis is horizontal. Coil has no wooden base. The coil is labelled with bar code labels, on either side of the coil.

Slit Coil

The slit is placed onto an eye to the sky wooden pallet with blue low density polyethylene plastic sheet between the slit and the wooden pallet. Two bar code labels are stapled to the wooden pallet. The slit is labelled with bar code labels.

4.14.2 Plate and Sheet

Hot rolled plate and Hot and Cold rolled sheet packing is suitable for rail/road/sea transport. The case is labelled with two bar code labels, one on either side of the case.

5 SLAB SUPPLIED FOR ROLLING OR FORGING

Types

Austenitic and ferritic types are available for re-rolling to ASTM A240, viz. 304, 304L, 310S, 316, 316L, 321 and 430. Other types may be available on enquiry.

Austenitic types are available for forging to ASTM A182, viz. F304, F304L, F316, F316L, F310 and F321 and F430. Other types may be available on enquiry.

Widths

The standard nominal slab widths are 1 030, 1 250, 1 280, 1 540 and 1 575 mm. Other widths may be available on enquiry.

Typical tolerance on width is ± 10 mm for austenitic material and ± 15 mm on ferritic material.

Lengths

Slab lengths are available between 4 100 mm and 12 000 mm, with a tolerance of ± 50 mm.

Thicknesses

Slabs are only available in thicknesses of 200 mm with a tolerance of ± 5 mm.

SUMMARY OF CHANGES

Revision	Paragraph	Detail of Change
9	4 15.9 15.2.1	Removed 410S equivalent to 1.4000. Min gauge for PE coating changed from 0.5 mm to 0.4 mm. Split BA / BE Column
10	15.2.1 22	Heat resisting grades only available as BE or 2E. 2B and 2D only available with the understanding that the surface will be lightly shot blasted. Correct reference to F310, not F310S
11	1.1 1.3 1.4 3.2.2.1 3.2.2.2 3.3 3.3.1.1 3.8 4.2.2.1 4.3.3.1 4.10 4.3 15.2.1	Updated Board of Directors Include document number and revision in Footer General numbering corrections and layout changes Moved Changes to end. Added C843 variation to 441 and 436M/T. Updated the Chemical compositions and Fixed errors. Removed 304LN. Fixed Errors Added C843 variation to 441 and 436M/T. Removed 304LN. Added full description to General field for 310S, as per 1.1 Added 436M/T. Removed 304LN Removed 304LN. Added note for 441 certification Corrected measurement position for mill edge material Added explanation for Typical Coil Mass. Added Ideal Pack Mass Added EN 10095 and IS 6911. Corrected name for ASME specification and removed revision. Noted that other specifications are possible. Added 436M/T. Removed 304LN. Removed duplicate note. Added explanation for Typical Coil Mass. Added Ideal Pack Mass. Section on pack mass limitation to prevent coils collapsing. Added EN 10095 and IS 6911. Corrected name for ASME specification and removed revision. Noted that other specifications are possible. Corrected certificate number for analysis only certification Corrected measurement position for mill edge material Removed "Unity"
12	1 1.4 3.1.1 3.1.2 3.2.3 3.2.4 3.2.5 4.1 4.2.2 4.2.3 5 5.1	Consolidation of data between hot and cold products and sequence changes Explain that the general chemistry is displayed Added additional equivalents 1.4513 for 431612, 1.4950 for 30911 and 1.4951 for 31085. Removed 30427 Display correct imperial dimensions Added comment of maximum piece mass for >16 mm plates Maximum gauges changed for 3CR12, 3CR12L & 40975, with the accompanying note removed Maximum gauges for all changed from 6 mm to 6.35 mm for standard imperial dimension Minimum for 202 and 301LN/301L changed to 3.5 mm Inserted Note 1 for specification restrictions on gauge Inserted Note 6 for H-grade and grain size limitation Updated Note 7 Inserted Note 8 for gauge above maximum processed as plate Updated maximum for 3CR12, 3CR12L & 40975 Added 436M/T Removed 202 and 301LN as possibilities Added HRA ranges for 309S, 309S Si & 310S Inserted Note 1 for specification restrictions on gauge Inserted mill's best gauge tolerances Display correct imperial dimensions Added 40975 Maximum gauges for all changed from 6mm to 6.35mm for standard imperial dimension Inserted 301LN range for polished wider than 1 300mm Inserted Note 1 for specification restrictions on gauge Inserted mill's best gauge tolerances Inserted Delivery Conditions with consolidated data Removed 2.2 analysis only certificates

Revision	Paragraph	Detail of Change
	5.1.1 5.3 5.4.3 5.5.1 5.6 5.9 5.10.2 5.12.1 6	ASME SA240 and ASTM A240 now also accredited Added Testing and Releasing Remove mass restriction on fourths Corrected available inner diameters Expanded on packing restrictions vs mass and width for slit coils Updated remark for slit coils Inserted code P80 Case marking added Removed CR Minimum Coil Mass Added minimum mass limitations Added F430
13	 1 1.1 1.1.3 1.2 2 3.1.5 3.2 3.3.2 3.3.3 4.1.3 4.2.1 4.2.2 4.2.3-4.2.12 4.10.1	Changed layout and sequence of some data to remove duplication for hot and cold rolled products Corrected Technical email address Clarified limits given Corrected 3CR12 limits Split between 17.5% and 18.0% minimum C for 304/304L Changes for 3CR12/3CR12L, 40920 and 304L Clarification on bottom finish for polished top finish Increased maximum gauge for 430, 430DDQ and 309 BE finish Insert Coil Dimensions Consolidated hot and cold rolled sheet and plate dimensions Updated with current capabilities of plant Insert blank dimensions Add CPR regulation number Add Mill's Best Range Shifted plate normal tolerance down to specification minimum of -0.30mm Add Mill's Best Range Added comment on Normal tolerance aim ranges Changed Normal to Split Add Width and Length Tolerances for the various products Added explanation for material marking differing from final material number Added sheet for No1 products No. 1 coil is line marked
14	1 1.1 1.3 1.4 3.1.3 3.1.4 3.1.5 3.1.6 3.2.2 3.3.2 3.3.3 4.2.2 4.5.1 4.10.2 4.13	Removed 1.4318 and 301LN for all product forms Corrected 410S Cr minimum Add 444T Removed 17.5-19.5 range for 304 Removed 1.4003 equivalent for 40975 Corrected equivalent types for 30423, 30431, 30442, 30911 and 31085 Add 444T Add 444T Add 444T Updated the correct minimum plate thicknesses Add notes about the available tolerance for min and max gauges Added imperial equivalents for 5.5 mm and 6.0 mm Add 444T Add notes about the available tolerance for min and max gauges Added maximum widths Add minimum length Add minimum dimensions Added positive tolerances 4.6mm ID added as option Update case label image Updated photos to display new packing material
15	IV 1.1.1	Added new products C590, C840 and C351 Changed general type of 202 to CS202, 43612 to 436M/T and 44412 to 444T Disclaimer updated Removed zirconium as stabilisation alternative Correct Ni for 3CR12 Changed 439Nb, 43920, 444 and 444T to Ti+Nb stabilisation in table, quoting the ASTM formula and updated Note 2 accordingly

Revision	Paragraph	Detail of Change
	1.2	Added BIS equivalents
		Changed CS202 to CS20211
	2	All BA is skin passed
	3.1.2	Minimum gauge for 439Nb changed to 3
	3.2.3	Maximum slit width is 6.35
	3.3.2	10-16 mm max not restricted for 3CR12
	4.1	Added direct links to certificates and annexures
		Moved PED and PESR under AD Mekblatt
	4.1.1.2	Added UKCA PESR
	4.1.3	Added UKCA CPR amend
	4.2.2	Added statement for deviation from specifications
		Added note about aim tolerances for slit on gauge > 6 mm
	4.2.7	Max gauge for slits increased
	4.4.2	Added flatness as seconds
	4.9	Added LAA as coating option
	4.10.1	Clarity added for continuously marked splits
	4.12.3	Updated table as per PAC-PRO-004
16	IV	New letterhead and logos
		New disclaimer
	4.2.8	Width / Length correction
17	1.2	Added JIS
	2	Added JIS
	3.3.3	Corrected max blank length
	4.1	Added approved JIS specifications
		Changed web page name and links to new document paths on extranet
	4.1.5	Added JIS certification
	4.2	JIS added
	4.2.3-4.2.5, 4.2.8-4.2.10	Expanded on requirements for special tolerances and standards to be consulted for specific tolerances
	4.2.12	Flatness added
	4.2.13	Camber added
	4.10.2	Added statement on marking on case label
18	III	Remove Fax numbers
	4.1	Ordering Information added
	4.2	Grammatical changes to certification types
	Annex A	Product Specification Sheet added
19	1.1.1	Corrections on multiple grades and layout/cosmetic changes
	1.1.2	Corrections on all grades
	1.1.3	Corrections on multiple grades
	1.2	Corrections to Columbus Types
	4.13.2	Corrected split of data
